Name

**Part I**

---

**Main part**

Use `\part` to divide the document into meaningful parts, e.g. theoretical part, experimental part etc.

Use `\partbacktext` to typeset some text on the backside of a part's title page if necessary.

```
\begin{partbacktext}  
\part{Name}  
Text  
\end{partbacktext}
```

## Chapter

a subtitle – does not appear in the TOC

### Chapter author

*Add some introductory text to a chapter using the motto command*

**Summary.** this is an abstract Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

Different types of chapters:

- `\chapter` with number, also appears in the table of contents
- `\Extrachap` without number but appears in the TOC, though
- `\extrachap` without number, hidden (no TOC entry)

### 1.1 Section

Different types of sections:

- `\section` with number, appears in the TOC
- `\Extrasect` without number, appears in the TOC
- `\extrasect` without number, not in TOC

#### 1.1.1 Subsection

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna

fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

#### 1.1.1.1 Subsubsection

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

#### *Paragraph*

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

*Subparagraph* Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

## 1.2 Images

Use following code to insert images:

```
\begin{figure}
  \centering
  \includegraphics{<image file>}
  \caption{This is the caption}
\end{figure}
```

Use `\begin{figure}[H]` to enforce placement at a specific position. However this is not recommended – the default L<sup>A</sup>T<sub>E</sub>X algorithm for the placement of figures gives probably better results.

Image with reference: Fig. 1.1.

**Fig. 1.1.** caption

If the desired image is not yet available, a placeholder of adequate size may be used; use either `example-image-a` or `so`, or perhaps `mpicplace`, see Fig. 1.2.

```
\begin{figure}
  \centering
  \mpicplace{4cm}{5cm}
  \caption{This is a placeholder}
  \label{fig:mpicplace}
\end{figure}
```

**Fig. 1.2.** This is a placeholder

### *Sidecaptions*

For quite long captions it is sometimes more convenient to place the caption next to the image instead of below. See Fig. 1.3 for an example.

**Fig. 1.3.** Long text Long text Long text Long text  
 Long text Long text Long text Long text Long text  
 Long text Long text Long text Long text Long text  
 Long text Long text Long text Long text

Note that the sidecaption is aligned such that it is on the right-hand side of the picture if it appears on an even page, and it is on the left-hand side of the picture if it appears on a odd page. This improves readability on two-sided prints.

```
\begin{figure}
  \sidecaption
  ...
  \caption{Text}
\end{figure}
```

`\sidecaption[t]` aligns the sidecaption at the top instead of at the bottom.

**Fig. 1.4.** Long text Long text Long text Long text Long text  
 Long text Long text Long text Long text Long text Long text  
 Long text Long text Long text Long text Long text Long text  
 Long text

*Multi figures*

Use `\leftfigure` and `\rightfigure` to place two images next to each other. See Fig. 1.5 and Fig. 1.6. Ensure both pictures do have the same height for aesthetic reasons. If the images don't have the same height, they are aligned at their bottom, such that the captions are at the same height. Use `\leftfigure[r]` to control the alignment (left or right, corresponding to `l` or `r`) of the image.

**Fig. 1.5.** Left image

**Fig. 1.6.** right image

Fig. 1.7. left

Fig. 1.8. right

*Subfigures*

Use `\subfigures` to ensure two images do have the same number with a and b as in Fig. 1.9a and Fig. 1.9b.

Fig. 1.9a. Long text Long text Long text  
Long text Long text Long text Long text Long text

Fig. 1.9b. Long text Long text Long text  
Long text Long text Long text Long text Long text

If one needs more subfigures, it is probably better to use `\subfloat`. However, stick to only one version – use either `\subfloat` or `\subfigures`, but don't mix them (again, aesthetic reasons...).

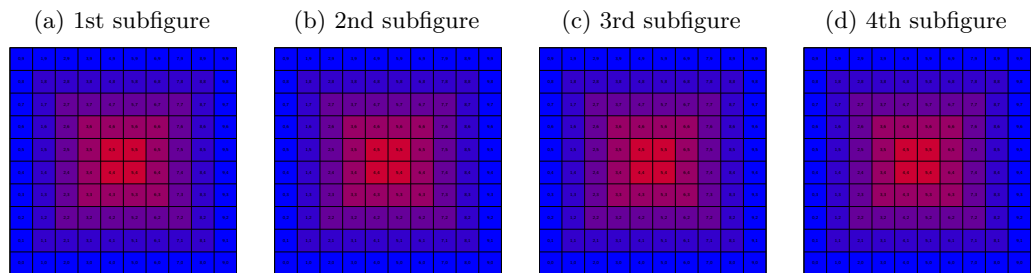

Fig. 1.10. A figure with multiple subfigures.

### 1.3 Equations

Maxwell's equations.

$$\oint_{\partial G} \mathbf{E} \cdot d\mathbf{s} = -\frac{d}{dt} \iint_G \mathbf{B} \cdot d\mathbf{A} \quad (1.1)$$

$$\oint_{\partial G} \mathbf{H} \cdot d\mathbf{s} = \frac{d}{dt} \iint_G \mathbf{D} \cdot d\mathbf{A} + \iint_G \mathbf{J} \cdot d\mathbf{A} \quad (1.2)$$

$$\oiint_{\partial G} \mathbf{B} \cdot d\mathbf{A} = 0 \quad (1.3)$$

$$\oiint_{\partial G} \mathbf{D} \cdot d\mathbf{A} = \iiint_G \rho \, dV \quad (1.4)$$

$$\nabla \cdot \mathbf{J} = -\frac{\partial \rho}{\partial t} \quad (1.5)$$

Some other stuff.

$$\mathbf{A} = \begin{pmatrix} a_{11} & a_{12} \\ a_{21} & a_{22} \end{pmatrix} \quad (1.6)$$

## 1.4 Misc stuff

*Proof.* Text

**Input:**  $n > 3$ , an odd integer to be tested for primality and  $k$ , a parameter that determines the accuracy of the test

**Output:** Composite if  $n$  is composite, otherwise probably prime

Write  $n-1$  as  $2^j d$  with  $d$  odd;

```

for  $i \leftarrow 1$  to  $k$  do
  Pick a random integer  $a$  in the range  $[2, n-2]$ ;
   $x \leftarrow a^d \pmod n$ ;
  if  $x = 1$  or  $x = n - 1$  then
    | continue
  else
    | for  $i \leftarrow 1$  to  $j - 1$  do
    | |  $x \leftarrow x^2 \pmod n$ ;
    | | if  $x = n - 1$  then
    | | | continue
    | | end
    | end
  end
  ;
return composite
end
return probably prime

```

**Algorithm 1:** Miller-Rabin algorithm

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

*Margin figures*

place small figures in the margin. Use `marginfigure` which works quite similar as `figure`. The margin figures probably need manual adjustment of their position, e.g. `\begin{marginfigure}[-5cm]` moves the figure 5 cm upwards. Fig. 1.11 is an example of a margin figure.

If one wants to typeset a section of text with a smaller font, the `\begin{petit}` and `\end{petit}` environment can be used.

Quisque ullamcorper placerat ipsum. Cras nibh. Morbi vel justo vitae lacus tincidunt ultrices. Lorem ipsum dolor sit amet, consectetur adipiscing elit. In hac habitasse platea dictumst. Integer tempus convallis augue. Etiam facilisis. Nunc elementum fermentum wisi. Aenean placerat. Ut imperdiet, enim sed gravida sollicitudin, felis odio placerat quam, ac pulvinar elit purus eget enim. Nunc vitae tortor. Proin tempus nibh sit amet nisl. Vivamus quis tortor vitae risus porta vehicula.

*Tables*

See the documentation to `booktabs` how to properly make tables. Tab. 1.1 is an example.

**Tab. 1.1.** this is a simple table

first column	2nd column
a	b
c	d

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

**Fig. 1.11.** Caption for margin figure – long text long text long text long text long text long text long text long text

some text in the margin can be typeset with `margin`text.

## Some basic typographic rules

1. Symbols in equations are usually cursive, like impedance  $Z$  or angle  $\alpha$ .
2. In contrast to symbols, units need to be in upright font, as follows: impedance  $Z$  in  $\Omega$  (correct), vs. *not*  $\Omega$  (wrong).
3. There is a difference between a minus sign and a hyphen. This is especially important if there is also a plus sign.

Hyphen: -12 °C

Minus sign: −12 °C

Plus sign: + (normal text), + (math mode). The plus has the same width as the minus. Always use math mode for minus signs.

4. Between a number and its unit, use a small space with `\,`.
5. Temperatures: The degree sign belongs to the unit, and not to the number. 100 °C oder −30 °F, ant *not* 100°C oder −30°F.
6. Angles: no space between the number and the unit. 30°
7. Charts: follow the rules of DIN-461 for making proper charts. Fig.2.1 is an example.

Long tables: Tab.2.1 is an example of a quite long table. Note the “continued on next page” footer and the repeated header.

**Tab. 2.1.** Ambient conditions record

date		T	RH	particle counter readings					
time	sign	°C	%	0.3 μm	0.5 μm	1 μm	2.5 μm	5 μm	10 μm

## Abbreviations and terms

### Abbreviations

List of abbreviations

<b>ALC</b>	automatic levelling control	<b>MMIC</b>	microwave monolithic integrated circuit
<b>CBN</b>	cubic boron nitride	<b>MOSFET</b>	metal oxide semiconductor FET
<b>CW</b>	continuous wave	<b>NCO</b>	numerically controlled oscillator
<b>DDS</b>	direct digital synthesis	<b>PA</b>	power amplifier
<b>DSP</b>	digital signal processor	<b>PAE</b>	power added efficiency
<b>ECL</b>	emitter coupled logic	<b>PCB</b>	printed circuit board
<b>FET</b>	field effect transistor	<b>PFD</b>	phase-frequency detector
<b>FFT</b>	fast Fourier transformation	<b>PLL</b>	phase locked loop
<b>FIR</b>	frequency invariant reactance	<b>QFN</b>	quad flat no-leads package
<b>FM</b>	frequency modulation	<b>RF</b>	radio frequency
<b>FoM</b>	figure of merit	<b>RMS</b>	root mean square
<b>GaAs</b>	gallium arsenide	<b>SOA</b>	safe operation area
<b>GaN</b>	gallium nitride	<b>SPICE</b>	simulation program with integrated circuit emphasis
<b>HBN</b>	hexagonal boron nitride	<b>VFO</b>	variable frequency oscillator
<b>HEMT</b>	high electron mobility transistor	<b>VGA</b>	variable gain amplifier
<b>IF</b>	intermediate frequency	<b>VCO</b>	voltage controlled oscillator
<b>IRL</b>	input return loss	<b>YIG</b>	Yttrium iron garnet
<b>ISM</b>	industrial, scientific and medical	<b>YTO</b>	YIG tuned oscillator
<b>JFET</b>	junction FET		
<b>LDMOS</b>	laterally diffused MOSFET		

### Glossary

## Symbols and constants

If not otherwise noted, the values of physical constants are taken from [7].

$c$	speed of light, $c \approx 2.9979 \cdot 10^8 \frac{\text{m}}{\text{s}}$
$\mu_0$	permeability of vacuum; $\mu_0 \approx 1.257 \cdot 10^{-6} \frac{\text{H}}{\text{m}}$
$N_a$	Avogadro's number, $6.022 \cdot 10^{23} \frac{1}{\text{mol}}$

---
